

# XPANDASOX®

A LITTLE BIT OF *fashion* WITH A LOT OF FUNCTION

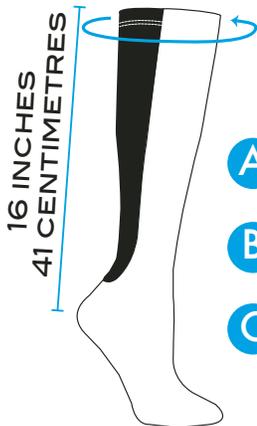

www.xpandasox.com

Xpandasox® are the first socks of its kind that stretch up to 24 inches (61 cm) and provide three levels of gradient compression, depending on calf circumference.

## GRADIENT COMPRESSION CHART

16 inch (41 cm) women's knee highs\*

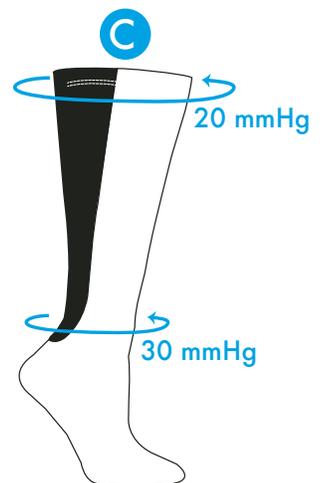

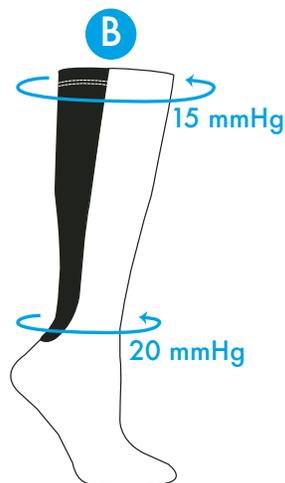

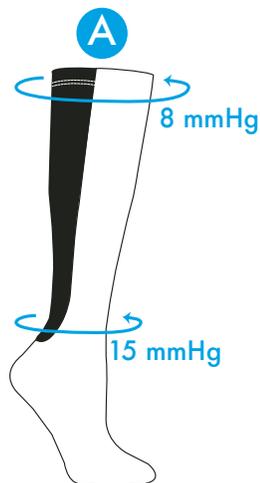

Measure around your calf, 16 inches (41 centimetres) up from your heel.

	CALF CIRCUMFERENCE	COMPRESSION LEVELS
A	15 inches - 18 inches (38 cm - 46 cm)	8-15 mmHg = light compression
B	18 inches - 21 inches (46 cm - 53 cm)	15-20 mmHg = mild compression
C	21 inches - 24 inches (53 cm - 61 cm)	20-30 mmHg = moderate compression

Compression testing performed at Manufacturing Solutions Center in North Carolina, USA

*one sock provides  
3 levels of gradient  
compression,  
depending on your  
calf size.*

\*Solid/Solid and Pattern/Solid Styles only. Excludes XpandaSport™, unisex and lace panel styles.
